4Q25 core ops inline

Silergy hosted its 4Q25 analyst meeting on Mar 13. 4Q25 revenue was NT\$5,392mn (+13.2% QoQ, 5.5% YoY), which came in 7%/5% above GSe/Bloomberg on stronger auto and consumer demand. In terms of margins, 4Q25 GM of 51.2% (up 0.9ppts) was slightly above GSe and largely inline with consensus, supported by more favorable product mix with higher auto revenue contribution. However, 4Q25 Opex ratio of 37.0% was higher vs. GSe/consensus of 35.5%/36.6% on continued investment in R&D and sales & marketing expense for new product ramp. Net net, 4Q25 EPS was NT\$2.09, slightly higher vs. GSe/consensus of NT\$2.00/NT\$1.93.

Growth visibility improves into 2H26

Management turned incrementally more constructive on 2026 vs. three months ago, noting that industry supply is gradually tightening with increasing rush orders from datacenter applications. The tightening trend reflects incremental structural demand from AI and EV-related applications. However, looking into full-year 2026, management expects growth to be back-end loaded, with 2H26 outperforming 1H26. Management targets a return to 20-30% YoY revenue growth in 2H26, supported by stronger auto demand from mainland China customers. Overall, we are now modeling 2026E revenue to grow 20.6% YoY, with GM reaching 52.8%, as revenue contribution from auto and datacenter segments continue to increase.

Looking into 2027, auto growth is expected to broaden beyond China as new clients ramps across Japan, Korea, Europe and US, supporting more diversified growth. Together with higher Gen 4 penetration and the gradual introduction of Gen 5 targeting datacenter application, both revenue and margin are expected to increase into 2027. Net net, we are now forecasting 2027 revenue to grow 25% YoY with GM at 53.5%.

Maintain Neutral on Silergy as risk-reward more balanced

While Silergy's revenue growth rate seems to have bottomed out and is building stronger narratives around AI-driven power demand and auto content expansion, we believe part of the improving industry outlook is already reflected in recent share price performance (Silergy up 42% YTD, vs. TAIEX up 18%). At the same time, operating expenses are set to increase in 2026 due to higher R&D and sales investments tied to new product ramps, potentially limiting near-term operating leverage. Accordingly, we revise down our 2026-2027E earnings by 23-35%. We raise our 12m TP to \$310 (from \$215), as we rollover to 2027E EPS (from 2026E) and lift our P/E to 23x (from 19.5x), reflecting recovery and improved demand visibility. With 10.7% upside implied vs. our coverage avg. for Buy-rated names of 28% upside, we maintain our Neutral rating on Silergy.

Earnings revisions, valuation and risks

Forecast changes: We revise down our 2026-27E EPS estimates by 22.7%/35.2% to factor in 1) 2H26 growth guidance, and 2) higher opex, as Silergy continues to invest for new products/clients.

Reiterate Neutral, TP revise up to NT\$310 from NT\$215

We revise up our 12-month TP to NT\$310 from NT\$215, and our target price is now based on a target P/E of 23x (from 19.5x; 30% discount to 2018-2021 P/E of 33x) to our 2027E EPS (rollover from 2026E). Our 30% discount is derived from 2025-2027E revenue CAGR relative to the previous 2018-2021 upcycle revenue CAGR given the improving cycle (previous basis was 1.0 stdv below 10-yr avg on 2026 EPS). Our new 12-month TP implies 10.7% upside potential from the current share price (vs. our coverage avg. Buy-rated names upside of c.28%), and we thus maintain Silergy at Neutral rating.

Investment Thesis - Silergy (6415.TW)

Silergy is a leading local PMIC (power management IC) design house. While we like Silergy's long-term growth story with continuous expansion into higher end segment such as server/data center, HPC, automotive, we still have concerns over 1) competition landscape, 2) pace of end demand recovery, 3) possible tariffs. We still see a severe competition from TI and mainland China local PMIC (power management IC) peers. As for overall demand, while we do expect a cyclical recovery in 2025 as inventory is further digested in the system, we are uncertain about the pace of recovery as we see inventory still at relatively high levels across key IDMs. Furthermore, we are also concerned about the impact to end demand from possible tariffs.

Silergy is now trading largely in line with its 5-year average P/E based on FY25E EPS, which we view as fair given the ongoing overhang from the competition from mainland China and Texas Instruments. We thus have a Neutral rating on Silergy.

Price Target Risks and Methodology

Valuation: Our 12m TP is NT\$310, based on a target P/E of 23x (30% discount to 2018-2021 P/E of 33x) applied to our 2027E EPS.

Key risks to our views: 1) Faster end-demand recovery, 2) better-than-expected cost controls, 3) faster progress with new addressable markets, 4) an easing competition landscape, and 5) geopolitical risks.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DA CF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company neither has a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority

of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators.
