AI server/networking device shipments and flagship smartphone demand are major growth drivers for Hon Hai to grow revenue >15% YoY in 2026. Management continues to focus on profitability enhancement and ROE upgrades; we estimate a 25% YoY rise in operating profit.

Key Takeaways

- 4Q25 net profit miss MSe and consensus by 33% and 27%, respectively, due to 0.3ppt YoY declines at gross and operating margin levels and a higher tax rate.
- 1Q26 revenue is seen down >15% QoQ but up >15% YoY, with cloud revenue flat QoQ on a higher consignment mix and AI server racks up high double digits.
- 2026 revenue should grow >15% YoY on flagship smartphone volume growth and ongoing AI server/rack shipment ramp-up.
- 2026 capex is budgeted to grow 30% YoY to >NT\$225bn for regional production set-ups and automation upgrades.
- 2025 cash dividend is proposed at NT\$7.2 per share, implying a 52.9% payout and 3.3% yield on today's closing price.

Dual drivers in 2026 - AI infrastructure + iPhone volume growth: AI server rack assembly capacity is aimed at 2,000 racks per week by this year, with AI server rack shipment growing quarter over quarter throughout the year. The GPU and ASIC customer mix is expected to be 8:2. Server board/module assembly and component offerings (busbar, liquid cooling, midplane, etc.) should enhance vertical integration. Consumer revenue is indicated to grow 4-14% YoY, despite the negative impact of memory cost hikes, indicating a healthy demand outlook.

Reiterate OW; cut PT to NT\$290: We reduce our EPS estimates 10% for 2026 and 14% for 2027, reflecting product mix changes and a higher tax rate (24-26%); we also introduce 2028 forecasts. Our PT falls to NT\$290, from NT\$317, implying 15x 2027e P/E. We view risk/reward as attractive as we see meaningful profit growth in 2026-28, and with valuation at 14x/11x 2026/27 P/Es, vs. AI peers at 8-25x.

OVERWEIGHT THESIS

- Servers should be the key growth driver in 2026, with increasing demand from CSP clients and strong AI server demand.
- We believe iPhone assembly revenue should increase YoY, driven by iPhone replacement demand in 2026.
- We believe Hon Hai's solid Apple exposure and AI server revenue growth potential are still underappreciated by the market.
- We expect the stock to re-rate to 18x 2026e P/E vs. its range of 7x to 16x P/E over the past three years.

BULL CASE

NT\$406.00

26x 2026e base case P/E

Faster AI business revenue contribution, operating margin expansion, stronger-than-expected iPhone shipments: We assume earnings benefit from economies of scale, faster progress in AI server business, and better-than-expected consumer product shipments.

BASE CASE

NT\$290.00

18x 2026e base case P/E

Margin improves via greater operating efficiency, increasing enterprise revenue, stable iPhone market share, and smooth AI business progress: We expect earnings improvement driven by disciplined cost management, along with enterprise segment growth, while smartphone assembly share remains stable. Contribution from AI server business should continue to ramp in 2026.

BEAR CASE

NT\$117.00

7x 2026e base case P/E

Weaker-than-expected iPhone shipments, operating margin erosion: We assume lower smartphone shipments and an ASP shortfall with margin erosion from lack of scale. We assume a smaller profit contribution from the AI business.

Estimate Revisions

We lower our 2026 and 2027 earnings estimate by 10% and 14%, respectively, and introduce 2028 at NT\$21.67. Our higher revenue forecasts are outweighed by lower margin assumptions and a higher income tax rate.

Price Target Revision and Valuation Methodology

We lower our price target by 9%, to NT\$290 from NT\$317. This reflects our reduced 2026-27 earnings estimates, partly offset by the introduction of our 2028 EPS forecast of NT\$21.67.

We derive our price target from a residual income (RI) valuation model. Our key assumptions – 8.5% cost of equity, medium-term growth rate of 13%, and 3% terminal growth rate – are unchanged.

Bull case value – NT\$406 (-9%): This implies 26x our 2026e EPS and mainly reflects our assumption that Hon Hai's margins will improve, driven by operating efficiency and AI server business ramping up more smoothly in the next 2-5 years vs. our previous bull case scenario.

Bear case value – NT\$117 (-9%): Here we assume that Hon Hai makes limited progress in the AI server business, and shows slower margin expansion. Our bear case scenario value implies 7x our 2026e EPS.

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.
