January Revenue Miss for Side-car CDU System Shipment Volatility

The miss does not alter our positive view on Delta, as we believe it remains a leader in server power offerings (AC-DC, DC-DC and 800 VDC) and liquid cooling solutions for AI data centers. This should drive substantial profit growth in 2026-27, in our view. Stay OW.

January revenue was 11% below our estimate at NT\$49.7bn, down 7% MoM but up 33% YoY: Power revenue grew 2% MoM thanks to sustained server power revenue and slightly better strength in the smartphone segment. Infrastructure revenue declined 23% MoM (still up 37% YoY), dragged mainly by decreased shipments of liquid cooling sidecar CDU systems and, to a lesser extent, slower shipments of networking and telecom related products.

Liquid cooling side-car CDU shipments increase the monthly revenue volatility, given the project-base business nature. We now estimate its liquid cooling revenue will decline 25-30% QoQ in 1Q26, still contributing 9-10% of its total revenue.

We now see 1Q26 revenue down 3% QoQ, vs. flat QoQ previously, after factoring in weaker January revenue. This assumes a slight revenue decline in February, as server power and liquid cooling revenue growth should offset most of the impact of fewer working days, and a further sequential ramp-up across the board in March. This implies a 32% YoY revenue increase for the quarter.

Continue to see strong business growth in 2026-27: We still expect 800 VDC power rack adoption and liquid cooling turnkey solutions to drive Delta's profit over the period, as highlighted in [our recent update on January 21](#).

Stay OW, maintain PT – Delta remains our Top Pick: Delta is due to announce its 4Q25 results on February 25 and host an earnings call on February 26. We would focus on 4Q25 operating margin and management comments about the 2026 business outlook, capacity expansion plan and operating margin trend, along with rising contribution from server power and liquid cooling systems.

BULL CASE

NT\$2,003.00

37x 2027e P/E

Strong sales growth with significant margin expansion: We assume a greater-than-expected contribution from higher-margin businesses such as power electronics and liquid cooling as well as greater synergies from acquired companies.

BASE CASE

NT\$1,638.00

31x 2027e P/E

Strong YoY revenue growth in 2026 and 2027, plus operating leverage: We expect steady growth in AI server power supply and data center infrastructure to be the key drivers. We see favorable mix and scale merits driving profit to double in 2027 vs. 2025.

BEAR CASE

NT\$800.00

15x 2027e P/E

Moderate sales growth with slight margin improvement: We assume further profit drag from legacy products, smaller profit contribution from higher-margin businesses, higher opex and/or less meaningful contribution from acquired companies.

Delta: Estimate Revisions

We lower 2025 and 2026 EPS estimates by 1% and 3%, respectively, while 2027 is unchanged. This reflects lower-than-expected 1Q26 revenue assumptions from weaker January revenue results and a slight revenue decline seen for February.
