| Price Target          | \$250.00 | \$260.00 |

NVIDIA reported revenues \$3 bn above guidance for the second consecutive quarter and guided \$5 bn above consensus, guided for growth each quarter this year and a focus on continuing in 2027. Reiterate OW.

Key Takeaways

- Largest, cleanest beat and raise in the history of the semis industry - surpassing the second best, which was NVIDIA 3 months ago
- As expected, the bigger investor question is durability, with hyperscale cash flows under pressure, but the underlying compute demand is clear
- Raising numbers, though budgeting for potential transitional issues to Rubin, and very slight margin pressure as new products ramp in 2h
- Moving to include stock comp in non GAAP impacts non GAAP EPS by about 25 cents but is a positive for earnings quality
- Stay OW; expect sentiment on AI investment to turn more positive

Numbers were at the high end of anyone's expectations, based on our conversations, yet the stock reaction after hours was muted. We are surprised at that, though we have highlighted (NVDA: FAQs on what it will take for the stock to outperform (29 Jan 2026)) that the bigger debates holding the stock back are longer term in nature. We would continue to argue that the long term also looks pretty good, while conceding that the growth next year will still be somewhat capital markets driven.

Our internet team (lead by Brian Nowak) shows free cash generation of the hyperscalers as under significant pressure, which continues to cause questions about sustainability. But there are counterpoints, with recent hyperscale commentary that the gap between supply and demand for token generation is growing by single digits every single day. LLM frontier model developers are calling for hundreds of gigawatts of compute capacity by 2029. Paying for all of that will be challenging, but we continue to point out that the compute demand is needed to manage inference/token growth, not aspirational training clusters, for the most part.

NVIDIA believes that the cash issues will be resolved by the cash flows of AI factories being much better than expected - but that in turn requires token

monetization that is also better than expected. While we would stop short of believing the most bullish 5 year views, we do continue to think that there is no visibility to any pause in the current levels of strong demand.

**Other nuggets on demand:** The company highlighted \$30 bn of sovereign demand, up 3x from FY25 to FY26 with strong visibility. Physical AI revenues were about \$6 bn in the fiscal year - at a relatively early stage for physical AI development. As expected, there continues to be no meaningful contribution from China, despite potential regulatory clearance to ship Hopper class products, and guidance assumes that there continues to be minimal contribution.

**Gross margins are holding strong at 75%, and the company highlighted that they will continue to target mid 70s for the year.** We would be a little careful forecasting 2H26 - mid 70s does not mean precisely 75%, and with component prices rising and new products ramping, we're modelling at just under 74%, with improvement as Rubin matures.

**Opex is a little higher than our forecast - on MUCH higher revenues for April.** While the company continues to add engineering talent as quickly as they can, we believe that there is a bit of a step up in April around the licensing of Groq technology, and the assimilation of large numbers of new employees, to drive low latency inference. This was a fairly large transaction that ends up as something of a rounding error given the exceptional growth.

**Separately, the company is moving to include stock compensation expense into non GAAP,** This does have the impact of bringing down non GAAP estimates by about \$0.25 to \$0.30, and appears to be simply an effort to be more conservative amid the longer term potential regulatory pressure to tighten up the quality of non GAAP estimates - which would start with the largest tech stocks. We view this positively, and note that we have always included stock compensation in our valuation methodology.

**Details on the Quarter:** January revenue of \$68.127bn (up 19.5% q/q and 73.5% y/y) was above the Street at \$66.126bn and our estimate of \$65.403bn. By segment, Data Center revenue of \$62.314bn was up 21.7% q/q and 75.1% y/y, Gaming was down 12.6% q/q and up 46.5% y/y to \$3.727bn, Professional Visualization was up 73.8% q/q and 158.5% y/y to \$1,321mn, Automotive was up 3.0% q/q and 6% y/y to \$604mn, and OEM & Other was down 7.5% q/q and 27.8% y/y to \$161mn. Gross margin of 75.2% was 0.2% above the Street and 0.1% above our estimate of 75.0% and 75.1%, respectively. Non-GAAP EPS of \$1.62 beat both the Street and our estimate of \$1.54, and \$1.52 respectively.

**NVIDIA guided for an \$10bn sequential revenue increase;** to \$78bn at the midpoint for April (up 14.5% q/q and 77.0% y/y), which came in ahead of the Street and our estimate of \$72.932bn and \$70.734bn, respectively, with data center once again the biggest contributor to growth. The company guided gross margin to 75.0%, compared to the Street at 74.5% and our estimate of 75.2%.

**Raising estimates:** We are increasing our revenue estimates for FY27 and FY28, now modeling 63.85% y/y growth and 27.87% y/y growth, respectively, vs 54.7% and 30.2% prior. For the July quarter, we move revenue from \$77.195bn to \$84.837bn

and non-GAAP EPS from \$1.84 to \$1.93. For FY27, our revenue and non-GAAP EPS move from \$329.829bn/\$7.81 to \$353.806/\$7.93, and FY28 comes up to \$452.409bn/\$10.14 from \$429.406bn/\$9.86 previously.

**Thoughts on the stock:** For the last 9 months, numbers have been coming up - and the rate of change has been improving - and the stock has mostly moved sideways, compressing the multiple. The stock trades at a very low multiple relative to its own history - which does make sense, with close to \$5 trillion in market cap, and limited operating margin leverage given very high profitability certainly. But for about the 5th time in the last 3 years, there appear to be generalist concerns that growth will slow, despite near term acceleration and the clear increase in model usage that is starting to have a major impact on productivity. There's a rich catalyst path here, with the CEO doing a keynote at our conference next week, and the GTC keynote in a couple of weeks that should feature roadmap updates, including potentially low latency inference/Groq as well as details on Rubin, Rubin Ultra, and potentially Feynman. We want to stay long the stock.

In terms of our PT, we are leaving our methodology unchanged from our prior of 26x MW EPS ests for CY27 (FY28). On our new \$10.05 MW EPS that brings the PT up to \$260 vs \$250 previously. 26x MW represents about 25.5x our new non-GAAP estimate of \$10.14 and roughly in-line with large-cap AI semis peer AVGO.

OW as large language model enthusiasm is transforming cloud capex

### PRICE TARGET \$260.00

~26x our MW CY27 EPS estimate of \$10.05, in-line with large cap AI peer AVGO, and a premium to semis overall. Reflecting our higher conviction in upward revisions to estimates, and premium margin/ growth profile within the space

### OVERWEIGHT THESIS

- Blackwell remains the premiere solution for gen-AI workloads, where compute demand continues to outstrip supply
- We see continued upward pressure to estimates as demand strength continues, with Rubin expected to maintain Nvidia's performance leadership position

#### BULL CASE

**\$330.00**

~30x bull case MW CY27 EPS of \$11

Bull case has DC revenues continuing to grow through 2027. Upside from networking, GB300 based systems, networking, and software create potential for a full stack AI computing company worthy of an even greater valuation premium

- Higher margin data center and AI-focused software and services growth accelerates
- GPU based AI PC gains traction, widely increasing the client TAM
- Automotive opportunity takes off, allowing the company to earn recurring, per-car licensing revenue

#### BASE CASE

**\$260.00**

~26x our MW CY27 EPS of \$10.05

~26x valuation is a premium to the semis group, and in-line with large cap AI peer AVGO, reflecting the expansion in all AI names as well as our higher conviction in estimates given NVIDIA's higher AI exposure. We believe that NVIDIA should trade at a premium given its higher probability of upward revisions in the near term.

- Revenue grows by 63.8% in 2026 and 27.8% in 2027

#### BEAR CASE

**\$160.00**

~18x bear case MW CY27 EPS of \$9

Two key debates both go the wrong direction, causing investors to question future prospects for growth

- Growth in DC slows substantially as supply catches up to demand faster than anticipated
- AI development costs come down materially, a strong competitor enters the market to take market share, or customers begin insourcing custom hardware solutions
- Greater than expected impact from tariff headwinds and export controls

Certain disclosures listed above are also for compliance with applicable regulations in non-US jurisdictions.

### STOCK RATINGS

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

### Global Stock Ratings Distribution

(as of January 31, 2026)

The Stock Ratings described below apply to Morgan Stanley's Fundamental Equity Research and do not apply to Debt Research produced by the Firm.

For disclosure purposes only (in accordance with FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Overweight, Equal-weight, Not-Rated and Underweight. Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold, and sell but represent recommended relative weightings (see definitions below). To satisfy regulatory requirements, we correspond Overweight, our most positive stock rating, with a buy recommendation; we correspond Equal-weight and Not-Rated to hold and Underweight to sell recommendations, respectively.

Morgan Stanley Research does not provide individually tailored investment advice. Morgan Stanley Research has been prepared without regard to the circumstances and objectives of those who receive it. Morgan Stanley recommends that investors independently evaluate particular investments and strategies, and encourages investors to seek the advice of a financial adviser. The appropriateness of an investment or strategy will depend on an investor's circumstances and objectives. The securities, instruments, or strategies discussed in Morgan Stanley Research may not be suitable for all investors, and certain investors may not be eligible to purchase or participate in some or all of them. Morgan Stanley Research is not an offer to buy or sell or the solicitation of an offer to buy or sell any security/instrument or to participate in any particular trading strategy. The value of and income from your investments may vary because of changes in interest rates, foreign exchange rates, default rates, prepayment rates, securities/instruments prices, market indexes, operational or financial conditions of companies or other factors. There may be time limitations on the exercise of options or other rights in securities/instruments transactions. Past performance is not necessarily a guide to future performance. Estimates of future performance are based on assumptions that may not be realized. If provided, and unless otherwise stated, the closing price on the cover page is that of the primary exchange for the subject company's securities/instruments.

The fixed income research analysts, strategists or economists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality, accuracy and value of research, firm profitability or revenues (which include fixed income trading and capital markets profitability or revenues), client feedback and competitive factors. Fixed Income Research analysts', strategists' or economists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

The "Important Regulatory Disclosures on Subject Companies" section in Morgan Stanley Research lists all companies mentioned where Morgan Stanley owns 1% or more of a class of common equity securities of the companies. For all other companies mentioned in Morgan Stanley Research, Morgan Stanley may have an investment of less than 1% in securities/instruments or derivatives of securities/instruments of companies and may trade them in ways different from those discussed in Morgan Stanley Research. Employees of Morgan Stanley not involved in the preparation of Morgan Stanley Research may have investments in securities/instruments or derivatives of securities/instruments of companies mentioned and may trade them in ways different from those discussed in Morgan Stanley Research. Derivatives may be issued by Morgan Stanley or associated persons.
