# Moving NVIDIA back to top pick in semis

| WHAT'S CHANGED        |      |        |
|-----------------------|------|--------|
| NVIDIA Corp. (NVDA.O) | From | To     |
| Top Pick Added        | MU.O | NVDA.O |

For the last two quarters NVIDIA has not moved while business has continued to strengthen - a function of concerns about the durability of current growth. Those concerns should turn to 2027 enthusiasm in the coming months. We see the stock at 18x CY27 EPS as a surprisingly good entry point.

## Key Takeaways

- Underperformance post strong numbers reflects concerns about market share and sustainability
- Market share concerns will be addressed at the coming GTC launch, demonstrating a leadership roadmap that again puts NVIDIA ahead of competition
- Sustainability is harder but across the board checks point to hyperscaler multiyear spending increases - conviction should grow
- \$260 PT unchanged as we catch up to the rest of the supply chain.

In September, we shifted our top pick from NVIDIA to Sandisk, then in November shifted to Micron. The thesis was that the strength in AI would drive more earnings leverage in other names, and that while strength at NVIDIA is central to the shortages in memory, the earnings power was higher elsewhere.

This effect was MUCH more pronounced than we had expected. Memory stocks, which were already up sharply when we made that call, are up 300%-900% since then, and NVIDIA is literally at the exact same price where we made the switch on current quarter earnings expectations that have grown 38% in six months.

Memory vs. NVIDIA is an interesting debate. There is a commonly voiced view that memory stocks are pricing in a much longer and more durable cycle than processor stocks; we actually somewhat disagree with that. Our memory conversations with clients are very similar to NVIDIA conversations - a clear recognition that conditions are exceptional in both right now, But a very strong peak year at current valuations has been viewed as more investable for memory, because upward revisions are more dynamic. There is not much conviction about 2027 for either stock.

And yet, conditions seem to point to multiple years of growth ahead. Ironically, it is memory prepayment that provides clarity to the situation. We are seeing hyperscalers place 3 year orders on memory suppliers, in some cases with full

Morgan Stanley does and seeks to do business with companies covered in Morgan Stanley Research. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of Morgan Stanley Research. Investors should consider Morgan Stanley Research as only a single factor in making their investment decision.

**For analyst certification and other important disclosures, refer to the Disclosure Section, located at the end of this report.**

prepayment - literally receiving 100% of 2028 revenue this quarter, with volumes at multiples of current levels. Are they doing that with the intent of slowing spending next year?

That's just one of dozens of indications that spending will continue to increase for multiple years. That said, as semiconductor analysts we are keenly aware of the predictive haziness of semiconductor data points beyond 12 months, so it's worth looking at what's happening downstream.

**The downstream bear case: hyperscalers lack of cash generation leaves no room for future growth.** This is not a concern without merit. We generally see some cloud infrastructure businesses - covered by Brian Nowak and Keith Weiss - running at negative cash flow. That can continue, of course - balance sheets are robust with material potential to raise cash. But if we believe the numbers, spending does seem likely to decelerate next year.

So how do we explain supply chain pointing to multiple years of growth that isn't supported by cash flow? Jensen's answer to that question on the call was that cloud companies will make more money on these investments than is generally being modeled. That makes sense? After all this capital spending is coming from the most technologically savvy companies in the world. There's a lag from capital spending to revenue generation, but the cloud GPU businesses are very profitable and we see market participant comments about "the gap in supply demand for compute is growing by single digits every day".

**The downstream bull case: Frontier model developers want many multiples of the current compute power each year.** Frontier model developers are consistently pointing to the need for hundreds of gigawatts of compute by 2029, vs. 30 or so this year. That is thought to be driven more by the revenue generating part of the business - inference - which is actually taking away compute from the desired investment areas - training.

**The reality lies somewhere in between, in our view.** If frontier model developers could invest in an unlimited fashion, there might be excess - normal in the investment stage in hypergrowth markets. But there simply isn't enough semiconductor capacity to come anywhere close to those numbers.

Further, the scenario that sees 2026 peaking is just not in evidence - very much the opposite - from all supply chain contacts globally, who are paying cash up front to secure substantial growth across the spectrum of commodity components through 2028. There is simply no indication that the current investment cycle has run its course, and there is plenty of evidence that the spenders intend to keep spending for at least a couple more years. Comments from industry participants about the growing undersupply of compute - for example a recent tweet that "the gap between compute demand and supply is growing by single digits each day" - would seem to point to a healthy and ultimately profitable investment cycle.

So we don't buy into hundreds of gigawatts in 2029, but we also don't see a peak in 2026, and our growth expectations for CY27 grow seemingly by the week.

**What about market share?** NVIDIA's revenue share is about 85%, with ASIC just above 10% and AMD just below 5%. Unlike early 2025 when we differed from

consensus and expected NVIDIA to gain share (which did play out), we do project peers to grow slightly faster than NVIDIA in CY26. Much of that is that it's just harder to grow as quickly when you are approaching \$80 bn per quarter in a supply constrained environment. So share might come down a little this year, perhaps a point or two.

But the product that every customer, including ASIC users and AMD users, is most focused on is Rubin, shipping in the second half from NVIDIA. Those customers can only get a fraction of what they want, so much of the competitive dynamic will still be Blackwell vs. competition, and Blackwell also should fare very well.

We would say that the moats have eroded a little bit, mostly because of the scale of the frontier model developers, who seem to be taking an architecturally agnostic approach to compute, with multiple approaches that incorporate NVIDIA, AMD, TPU through Google cloud, and internal ASICs. So there's room for multiple approaches, but from our checks we still find preference for NVIDIA in many cases, even in areas where third parties tout lower cost of ownership for peers. The two biggest users of ASICs, and the two biggest potential users of AMD, are each likely to grow their business with NVIDIA by 80%+ in CY26, from our checks.

**Supply constraints on AI processors may ease in the next few months, which may well favor NVIDIA.** To be clear, that is not currently in evidence, but it is more than possible given constraints on DRAM, eSSD, HDD, optical, microprocessors, and power that may all become bigger bottlenecks than the very steep ramp in processors - it might be a challenge for NVIDIA stock, since 90% of industry checks focus on easily accessible supply chain data points - CoWoS, lead times, etc - rather than demand. But we have high conviction that it would lead to market share re-acceleration, similar to what we saw in CY24 when GPU lead times declined because of space and power constraints.

**GTC can't completely convince cynical investors about sustainability of capex, but should bring back confidence on the market share point.** We're not sure exactly what to expect from GTC, but it should look very similar to 2024, when we got a full look into NVIDIA's 4 year roadmap and it became clear that this race is not just about the silicon, but also rack and ecosystem development. We expect the Groq IP to play a role in this roadmap as well.

**How sure are we that these events will move the stock? Why isn't the stock working already?** A month ago, we wrote a note suggesting that near term expectations were very high, and that the key to outperformance was less about near term upside and more about long term comfort. We were distracted in the interim by how good we thought the quarter would be - and it was - but we come back to that view that the important element is the durability of current demand, not the strength of the current environment, which should be a given.

**But in each of the last 3 years, early in the year there was skepticism about the following year, and each time when visibility filled in and we realized the strength was durable, the stock had bursts of outperformance.** Some year those concerns may be right, but our conviction is pretty high that this pattern will repeat.

How can we be wrong? A number of ways. To list a few:

- While we believe that the strength in token growth will endure, the capital intensity remains high and we will continue to need a vibrant capital market to fund the spending or we could see a pause.
- New approaches could matter. NVIDIA's acquisition of the assets of Groq are an indication that an SRAM based high speed inference approach can be relevant, and the economics could be different
- Small risks to gross margins as memory prices rise. Passing along a 100% increase in DRAM price with 75% gross margins has its challenges; we model 2h GMs just below 74% vs. guidance of mid 70s, which we think is reasonable
- The P/E multiple could simply remain low. We think 18x next year is compelling, but the very high market cap, index weighting, 85% market share, very high EBIT margins, all leave fewer knobs to turn to get earnings numbers higher.

But the opportunity to buy the central name in hardware at 18x next year, when although near term expectations are high, sentiment on durability of growth and market share are at a low point, feels like a high percentage outcome. As such we move NVDA to top pick.

**Exhibit 1:** Nvidia PE back at liberation day lows

Source: Factset, Morgan Stanley

**Exhibit 2:** Nvidia's PE vs the S&P 500 continues to make new lows

Source: Factset, Morgan Stanley

**Stay with high conviction OW on MU:** While the sharp appreciation in the stock limits the upside - our price target is \$450 - we remain highly convicted that memory markets will remain strong. Further, we would argue that some of the same duration arguments that we just made for NVIDIA also likely apply to DRAM, where investors are very positive short term but generally thinking about a 2026 exit strategy which we think may be premature. Further, Micron should be able to sign longer term commitments with cloud customers that are different from those in the past - in some cases with multiple years of prepayments - that should help the duration argument.

So we wouldn't make this a negative call on MU in any way, just an indication that NVIDIA sentiment needs to "catch up" for Micron to continue to appreciate.

## Risk Reward – NVIDIA Corp. (NVDA.O) Top Pick

OW as large language model enthusiasm is transforming cloud capex

### PRICE TARGET \$260.00

~26x our MW CY27 EPS estimate of \$10.05, in-line with large cap AI peer AVGO, and a premium to semis overall. Reflecting our higher conviction in upward revisions to estimates, and premium margin/ growth profile within the space

#### Consensus Price Target Distribution

Source: Refinitiv, Morgan Stanley Research

### RISK REWARD CHART AND OPTIONS IMPLIED PROBABILITIES (12M)

Key: — Historical Stock Performance ● Current Stock Price ◆ Price Target

Source: Refinitiv, Morgan Stanley Research, Morgan Stanley Institutional Equities Division. The probabilities of our Bull, Base, and Bear case scenarios playing out were estimated with implied volatility data from the options market as of 27 Feb 2026. All figures are approximate risk-neutral probabilities of the stock reaching beyond the scenario price in either three-months' or one-years' time. View explanation of Options Probabilities methodology [here](#)

### OVERWEIGHT THESIS

- Blackwell remains the premiere solution for gen-AI workloads, where compute demand continues to outstrip supply
- We see continued upward pressure to estimates as demand strength continues, with Rubin expected to maintain Nvidia's performance leadership position

#### Consensus Rating Distribution

Source: Refinitiv, Morgan Stanley Research

#### Risk Reward Themes

New Data Era: *Positive*  
Pricing Power: *Positive*  
Secular Growth: *Positive*

View descriptions of Risk Rewards Themes [here](#)

#### BULL CASE

**\$330.00**

~30x bull case MW CY27 EPS of \$11

Bull case has DC revenues continuing to grow through 2027. Upside from networking, GB300 based systems, networking, and software create potential for a full stack AI computing company worthy of an even greater valuation premium

- Higher margin data center and AI-focused software and services growth accelerates
- GPU based AI PC gains traction, widely increasing the client TAM
- Automotive opportunity takes off, allowing the company to earn recurring, per-car licensing revenue

#### BASE CASE

**\$260.00**

~26x our MW CY27 EPS of \$10.05

~26x valuation is a premium to the semis group, and in-line with large cap AI peer AVGO, reflecting the expansion in all AI names as well as our higher conviction in estimates given NVIDIA's higher AI exposure. We believe that NVIDIA should trade at a premium given its higher probability of upward revisions in the near term.

- Revenue grows by 63.8% in 2026 and 27.8% in 2027

#### BEAR CASE

**\$160.00**

~18x bear case MW CY27 EPS of \$9

Two key debates both go the wrong direction, causing investors to question future prospects for growth

- Growth in DC slows substantially as supply catches up to demand faster than anticipated
- AI development costs come down materially, a strong competitor enters the market to take market share, or customers begin insourcing custom hardware solutions
- Greater than expected impact from tariff headwinds and export controls

## Valuation Methodology and Risks

### **Micron Technology Inc. (MU.O)**

25x through-cycle earnings of US \$18.00, a premium to history reflecting new opportunities in AI, At the high end of broader semis.

#### **Risks to Upside**

- Customers continue to demonstrate an appetite to take on inventory around macroeconomic uncertainty
- Additional wafer intensity of HBM further improves overall supply and demand
- Micron's HBM share surpasses expectations

#### **Risks to Downside**

- Pricing can turn quickly; a falter in end demand with inventories elevated could lead to a swift price reduction
- HBM demand falters and competition intensifies, pressuring pricing

### Important Regulatory Disclosures on Subject Companies

As of January 30, 2026, Morgan Stanley beneficially owned 1% or more of a class of common equity securities of the following companies covered in Morgan Stanley Research: Advanced Micro Devices, Aeva Technologies Inc, Allegro Microsystems Inc, Ambarella Inc, Analog Devices Inc., Arm Holdings plc, Astera Labs Inc, Broadcom Inc., Cadence Design Systems Inc, Intel Corporation, IonQ Inc, Marvell Technology Group Ltd, Microchip Technology Inc., Micron Technology Inc., **NVIDIA Corp.**, NXP Semiconductor NV, ON Semiconductor Corp., Qorvo Inc, Qualcomm Inc., SanDisk Corporation., Semtech Corp., Silicon Laboratories Inc., Skyworks Solutions Inc, Synopsys Inc., Texas Instruments, Wolfspeed, INC.

Within the last 12 months, Morgan Stanley managed or co-managed a public offering (or 144A offering) of securities of Advanced Micro Devices, Analog Devices Inc., Broadcom Inc., Intel Corporation, Micron Technology Inc., NXP Semiconductor NV, Qualcomm Inc., Semtech Corp., Texas Instruments.

Within the last 12 months, Morgan Stanley has received compensation for investment banking services from Advanced Micro Devices, Aeva Technologies Inc, Allegro Microsystems Inc, Amkor Technology Inc, Analog Devices Inc., Broadcom Inc., Intel Corporation, IonQ Inc, Micron Technology Inc., NXP Semiconductor NV, Qualcomm Inc., Semtech Corp., Texas Instruments.

In the next 3 months, Morgan Stanley expects to receive or intends to seek compensation for investment banking services from Advanced Micro Devices, Aeva Technologies Inc, Allegro Microsystems Inc, Ambarella Inc, Amkor Technology Inc, Analog Devices Inc., Arm Holdings plc, Astera Labs Inc, Broadcom Inc., Cadence Design Systems Inc, GlobalFoundries Inc, Intel Corporation, IonQ Inc, Microchip Technology Inc., Micron Technology Inc., Navitas Semiconductor Corp, **NVIDIA Corp.**, NXP Semiconductor NV, ON Semiconductor Corp., Qorvo Inc, Qualcomm Inc., SanDisk Corporation., Semtech Corp., Silicon Laboratories Inc., Skyworks Solutions Inc, Synopsys Inc., Texas Instruments, Wolfspeed, INC.

Within the last 12 months, Morgan Stanley has received compensation for products and services other than investment banking services from Advanced Micro Devices, Ambarella Inc, Amkor Technology Inc, Analog Devices Inc., Broadcom Inc., Cadence Design Systems Inc, GlobalFoundries Inc, Intel Corporation, IonQ Inc, Marvell Technology Group Ltd, Microchip Technology Inc., Micron Technology Inc., **NVIDIA Corp.**, NXP Semiconductor NV, ON Semiconductor Corp., Qualcomm Inc., Silicon Laboratories Inc., Synopsys Inc., Texas Instruments.

Within the last 12 months, Morgan Stanley has provided or is providing investment banking services to, or has an investment banking client relationship with, the following company: Advanced Micro Devices, Aeva Technologies Inc, Allegro Microsystems Inc, Ambarella Inc, Amkor Technology Inc, Analog Devices Inc., Arm Holdings plc, Astera Labs Inc, Broadcom Inc., Cadence Design Systems Inc, GlobalFoundries Inc, Intel Corporation, IonQ Inc, Microchip Technology Inc., Micron Technology Inc., Navitas Semiconductor Corp, **NVIDIA Corp.**, NXP Semiconductor NV, ON Semiconductor Corp., Qorvo Inc, Qualcomm Inc., SanDisk Corporation., Semtech Corp., Silicon Laboratories Inc., Skyworks Solutions Inc, Synopsys Inc., Texas Instruments, Wolfspeed, INC.

Within the last 12 months, Morgan Stanley has either provided or is providing non-investment banking, securities-related services to and/or in the past has entered into an agreement to provide services or has a client relationship with the following company: Advanced Micro Devices, Ambarella Inc, Amkor Technology Inc, Analog Devices Inc., Broadcom Inc., Cadence Design Systems Inc, GlobalFoundries Inc, Intel Corporation, IonQ Inc, Marvell Technology Group Ltd, Microchip Technology Inc., Micron Technology Inc., **NVIDIA Corp.**, NXP Semiconductor NV, ON Semiconductor Corp., Qualcomm Inc., Semtech Corp., Silicon Laboratories Inc., Synopsys Inc., Texas Instruments, Wolfspeed, INC.

Morgan Stanley & Co. LLC makes a market in the securities of Aeva Technologies Inc, Ambarella Inc, Silicon Laboratories Inc..

The equity research analysts or strategists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality of research, investor client feedback, stock picking, competitive factors, firm revenues and overall investment banking revenues. Equity Research analysts' or strategists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

Morgan Stanley and its affiliates do business that relates to companies/instruments covered in Morgan Stanley Research, including market making, providing liquidity, fund management, commercial banking, extension of credit, investment services and investment banking. Morgan Stanley sells to and buys from customers the securities/instruments of companies covered in Morgan Stanley Research on a principal basis. Morgan Stanley may have a position in the debt of the Company or instruments discussed in this report. Morgan Stanley trades or may trade as principal in the debt securities (or in related derivatives) that are the subject of the debt research report.

Certain disclosures listed above are also for compliance with applicable regulations in non-US jurisdictions.

### STOCK RATINGS

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

### Global Stock Ratings Distribution

(as of February 28, 2026)

The Stock Ratings described below apply to Morgan Stanley's Fundamental Equity Research and do not apply to Debt Research produced by the Firm.

For disclosure purposes only (in accordance with FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Overweight, Equal-weight, Not-Rated and Underweight. Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold, and sell but represent recommended relative weightings (see definitions below). To satisfy regulatory requirements, we correspond Overweight, our most positive stock rating, with a buy recommendation; we correspond Equal-weight and Not-Rated to hold and Underweight to sell recommendations, respectively.

| Stock Rating Category | Coverage Universe |            | Investment Banking Clients (IBC) |                |                      | Other Material Investment Services Clients (MISC) |                       |
|-----------------------|-------------------|------------|----------------------------------|----------------|----------------------|---------------------------------------------------|-----------------------|
|                       | Count             | % of Total | Count                            | % of Total IBC | % of Rating Category | Count                                             | % of Total Other MISC |
| Overweight/Buy        | 1528              | 41%        | 444                              | 49%            | 29%                  | 690                                               | 42%                   |

| Not-Rated/Hold        | 4                 | 0%         | 1                                | 0%             | 25%                  | 1                                                 | 0%                    |
| Underweight/Sell      | 588               | 16%        | 87                               | 10%            | 15%                  | 220                                               | 13%                   |
| Total                 | 3,710             |            | 906                              |                |                      | 1636                                              |                       |

Data include common stock and ADRs currently assigned ratings. Investment Banking Clients are companies from whom Morgan Stanley received investment banking compensation in the last 12 months. Due to rounding off of decimals, the percentages provided in the "% of total" column may not add up to exactly 100 percent.

## Analyst Stock Ratings

Overweight (O). The stock's total return is expected to exceed the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Equal-weight (E). The stock's total return is expected to be in line with the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Not-Rated (NR). Currently the analyst does not have adequate conviction about the stock's total return relative to the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Underweight (U). The stock's total return is expected to be below the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Unless otherwise specified, the time frame for price targets included in Morgan Stanley Research is 12 to 18 months.

## Analyst Industry Views

Attractive (A): The analyst expects the performance of his or her industry coverage universe over the next 12-18 months to be attractive vs. the relevant broad market benchmark, as indicated below.

In-Line (I): The analyst expects the performance of his or her industry coverage universe over the next 12-18 months to be in line with the relevant broad market benchmark, as indicated below.

Cautious (C): The analyst views the performance of his or her industry coverage universe over the next 12-18 months with caution vs. the relevant broad market benchmark, as indicated below. Benchmarks for each region are as follows: North America - S&P 500; Latin America - relevant MSCI country index or MSCI Latin America Index; Europe - MSCI Europe; Japan - TOPIX; Asia - relevant MSCI country index or MSCI sub-regional index or MSCI AC Asia Pacific ex Japan Index.

## Important Disclosures for Morgan Stanley Smith Barney LLC Customers

Important disclosures regarding any material conflict of interest that can reasonably be expected to have influenced Morgan Stanley Smith Barney LLC's choice of a third-party research provider or the subject company of a third-party research report, are available on the Morgan Stanley Wealth Management disclosure website at [www.morganstanley.com/online/researchdisclosures](http://www.morganstanley.com/online/researchdisclosures). For Morgan Stanley specific disclosures, you may refer to <https://www.morganstanley.com/eqr/disclosures/webapp/generalresearch>.

Each Morgan Stanley research report is reviewed and approved on behalf of Morgan Stanley Smith Barney LLC. This review and approval is conducted by the same person who reviews the research report on behalf of Morgan Stanley. This could create a conflict of interest.

## Other Important Disclosures

A member of Research who had or could have had access to the research prior to completion owns securities (or related derivatives) in the Micron Technology Inc., NVIDIA Corp.. This person is not a research analyst or a member of research analyst's household.

Morgan Stanley Research policy is to update research reports as and when the Research Analyst and Research Management deem appropriate, based on developments with the issuer, the sector, or the market that may have a material impact on the research views or opinions stated therein. In addition, certain Research publications are intended to be updated on a regular periodic basis (weekly/monthly/quarterly/annual) and will ordinarily be updated with that frequency, unless the Research Analyst and Research Management determine that a different publication schedule is appropriate based on current conditions.

Morgan Stanley is not acting as a municipal advisor and the opinions or views contained herein are not intended to be, and do not constitute, advice within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act.

Morgan Stanley produces an equity research product called a "Tactical Idea." Views contained in a "Tactical Idea" on a particular stock may be contrary to the recommendations or views expressed in research on the same stock. This may be the result of differing time horizons, methodologies, market events, or other factors. For all research available on a particular stock, please contact your sales representative or go to Matrix at <http://www.morganstanley.com/matrix>.

Morgan Stanley Research is provided to our clients through our proprietary research portal on Matrix and also distributed electronically by Morgan Stanley to clients. Certain, but not all, Morgan Stanley Research products are also made available to clients through third-party vendors or redistributed to clients through alternate electronic means as a convenience. For access to all available Morgan Stanley Research, please contact your sales representative or go to Matrix at <http://www.morganstanley.com/matrix>.

If you do not agree to our Terms of Use and/or if you do not wish to provide your consent to Morgan Stanley processing your personal data or using cookies please do not access our research. Morgan Stanley Research does not provide individually tailored investment advice. Morgan Stanley Research has been prepared without regard to the circumstances and objectives of those who receive it. Morgan Stanley recommends that investors independently evaluate particular investments and strategies, and encourages investors to seek the advice of a financial adviser. The appropriateness of an investment or strategy will depend on an investor's circumstances and objectives. The securities, instruments, or strategies discussed in Morgan Stanley Research may not be suitable for all investors, and certain investors may not be eligible to purchase or participate in some or all of them. Morgan Stanley Research is not an offer to buy or sell or the solicitation of an offer to buy or sell any security/instrument or to participate in any particular trading strategy. The value of and income from your investments may vary because of changes in interest rates, foreign exchange rates, default rates, prepayment rates, securities/instruments prices, market indexes, operational or financial conditions of companies or other factors. There may be time limitations on the exercise of options or other rights in securities/instruments transactions. Past performance is not necessarily a guide to future performance. Estimates of future performance are based on assumptions that may not be realized. If provided, and unless otherwise stated, the closing price on the cover page is that of the primary exchange for the subject company's securities/instruments.

The fixed income research analysts, strategists or economists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality, accuracy and value of research, firm profitability or revenues (which include fixed income trading and capital markets profitability or revenues), client feedback and competitive factors. Fixed Income Research analysts', strategists' or economists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

The "Important Regulatory Disclosures on Subject Companies" section in Morgan Stanley Research lists all companies mentioned where Morgan Stanley owns 1% or more of a class of common equity securities of the companies. For all other companies mentioned in Morgan Stanley Research, Morgan Stanley may have an investment of less than 1% in securities/instruments or derivatives of securities/instruments of companies and may trade them in ways different from those discussed in Morgan Stanley Research. Employees of Morgan Stanley not involved in the preparation of Morgan Stanley Research may have investments in securities/instruments or derivatives of securities/instruments of companies mentioned and may trade them in ways different from those discussed in Morgan Stanley Research. Derivatives may be issued by Morgan Stanley or associated persons.

With the exception of information regarding Morgan Stanley, Morgan Stanley Research is based on public information. Morgan Stanley makes every effort to use reliable, comprehensive information, but we make no representation that it is accurate or complete. We have no obligation to tell you when opinions or information in Morgan Stanley Research change apart from when we intend to discontinue equity research coverage of a subject company. Facts and views presented in Morgan Stanley Research have not been reviewed by, and may not reflect information known to, professionals in other Morgan Stanley business areas, including investment banking personnel.

Morgan Stanley Research personnel may participate in company events such as site visits and are generally prohibited from accepting payment by the company of associated expenses unless pre-approved by authorized members of Research management.

Morgan Stanley may make investment decisions that are inconsistent with the recommendations or views in this report.

To our readers based in Taiwan or trading in Taiwan securities/instruments: Information on securities/instruments that trade in Taiwan is distributed by Morgan Stanley Taiwan Limited ("MSTL"). Such information is for your reference only. The reader should independently evaluate the investment risks and is solely responsible for their investment decisions. Morgan Stanley Research may not be distributed to the public media or quoted or used by the public media without the express written consent of Morgan Stanley. Any non-customer reader within the scope of Article 7-1 of the Taiwan Stock Exchange Recommendation Regulations accessing and/or receiving Morgan Stanley Research is not permitted to provide Morgan Stanley Research to any third party (including but not limited to related parties, affiliated companies and any other third parties) or engage in any activities regarding Morgan Stanley Research which may create or give the

appearance of creating a conflict of interest. Information on securities/instruments that do not trade in Taiwan is for informational purposes only and is not to be construed as a recommendation or a solicitation to trade in such securities/instruments. MSTL may not execute transactions for clients in these securities/instruments.
