Weekly: Jan SIA shows a strong start to the year

Broad markets and memory overall came in above seasonality and our estimates - where memory led strength again. Stay positive on semis especially AI centric names, including top pick NVDA.

SIA data for January was overall strong, with memory outpacing broad market strength. January Semiconductor Industry Association billings data reported on Friday, March 6th, came in above our estimates and seasonality for broad markets:

- Overall: Sales were down 4.9% m/m, above our estimate of -15.7% and above the 10-yr average change of -9.8%. 3-month y/y growth accelerated from 37.1% to 44.8%, and one month y/y growth was 58.2%.
- Trend by geography (y/y): Asia Pacific (+90.8%) was followed by China (+61.9%), The Americas (+47.4%), and Europe (+37.9%), while Japan was flat (-0.5%).

Broad markets overall were strong, following a mixed December:

- **Discrete** (miss): -4.1% m/m vs our estimate of -8.0% and the 10-yr average change of -8.4%. Units were below the 10-yr average (-7.9% vs -5.0%) as well as ASP (-4.6% vs -3.3%).
- **Analog** (beat): -2.7% m/m vs our estimate of -6.0% and 10-yr average of -6.2%. Units were below the 10-yr average (-3.1% vs -14.4%) as well as ASP (0.4% vs 10.5%).
- **MCU** (beat): 0.1% m/m vs our estimate of -9% and 10-yr average change of -9.3%. Units were above the 10-yr average (3.5% vs -8%) while ASP was below (-3.3% vs -0.7%).
- **MPU** (beat): -10.8% m/m vs our estimate of -16.0% and 10-yr average change of -16.0%.

Recovery momentum continues to oscillate between stronger and softer months, consistent with recent supplier commentary in analog and MCU. That said, leading indicators have begun to improve, with lead times extending, longer-term bookings layering in, and increasing pricing power. At the same time, tighter wafer availability at mature nodes - driven by ongoing allocation toward leading-edge capacity - is increasing the likelihood of incremental supply constraints, which could provide additional support to the recovery trajectory.

In analog, 3-month average y/y growth accelerated slightly to 13.4% in January from

13.3% in December, marking the eighth consecutive month of improvement and the strongest level since October 2022 (19.4%). Growth was led by ASIC, primarily within the Industrial & Others end market. MCUs 3-month average y/y growth rose to 12.9% vs 10.6% in December, the highest level since October 2023 (11.7%). Growth was led by General Purpose while Automotive MCU declined slightly.

Memory was above seasonality in January, with pricing strength continuing to outpace:

- **DRAM:** Above expectation and 5-yr average, coming in at -5.3% m/m vs our estimate of -36.7% and 5-yr average of -24.3%. Bits were above our estimate (-22.4% vs -36.8%) while ASP was above (22.1% vs 0.1%). On a 3-month y/y basis, total DRAM sales reached 105.4% in January, the highest level since September 2024 (109.7%), while ASP growth (52.7%) has now increased for six consecutive quarters.
- **NAND:** Above expectation and the 5-yr average, coming in at 7.2% m/m vs our estimate of -24.4% and 5-yr average of -25.3%. Bits were above our estimate (-16.6% m/m vs -30%) as well as ASP (28.5% vs 8.0%). On a 3-month average y/y basis, revenue reached 59% in January, the highest level since November 2024 (66.6%), while ASP growth of 38.4% is the highest since Dec 2024 (50.8%) and volume declined for the third straight quarter (16%).

Memory fundamentals remain firm, with January extending the pricing-led strength seen in December. In DRAM, results were well above seasonal norms as robust ASP gains more than offset softer bit shipments, pushing three-month average revenue to its highest level since early fall and reinforcing that tight supply continues to drive the cycle. NAND showed a similar pattern, delivering positive sequential growth against typical January weakness, with pricing again doing most of the work. While volumes remain mixed, sustained supply discipline and steady hyperscaler demand suggest pricing power in DRAM remains intact, with NAND recovery gradually becoming more durable.

Changes to our forecast : Our forecast comes up, with CY26 at 64.6% (prior 46.3%), and CY27 at 16.9%/\$1,523mn vs prior 17.6%/\$1,361mn, mostly due to memory pricing.

Our take: AI continues to power overall numbers higher. We are seeing the ongoing strength in AI starting to crowd out the rest of the supply chain in a bit way, causing supply constraints in both 5 nm logic and memory. At this point, our favorite way to play that is through NVDA, which seems due for a catch-up vs. the broader market; we also remain positive on other AI centric names including AVGO and ALAB. Broader beneficiaries of supply chain strength include MU, SNDK, AMAT, and MKSI, and we remain positive on the semiconductor device market overall.

Morgan Stanley & Co. LLC makes a market in the securities of Aeva Technologies Inc, Ambarella Inc, MKS Inc., Silicon Laboratories Inc.

The equity research analysts or strategists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality of research, investor client feedback, stock picking, competitive factors, firm revenues and overall investment banking revenues. Equity Research analysts' or strategists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

Morgan Stanley and its affiliates do business that relates to companies/instruments covered in Morgan Stanley Research, including market making, providing liquidity, fund management, commercial banking, extension of credit, investment services and investment banking. Morgan Stanley sells to and buys from customers the securities/instruments of companies covered in Morgan Stanley Research on a principal basis. Morgan Stanley may have a position in the debt of the Company or instruments discussed in this report. Morgan Stanley trades or may trade as principal in the debt securities (or in related derivatives) that are the subject of the debt research report.

Certain disclosures listed above are also for compliance with applicable regulations in non-US jurisdictions.

STOCK RATINGS

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan

Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

Global Stock Ratings Distribution

(as of February 28, 2026)

The Stock Ratings described below apply to Morgan Stanley's Fundamental Equity Research and do not apply to Debt Research produced by the Firm.

For disclosure purposes only (in accordance with FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Overweight, Equal-weight, Not-Rated and Underweight. Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold, and sell but represent recommended relative weightings (see definitions below). To satisfy regulatory requirements, we correspond Overweight, our most positive stock rating, with a buy recommendation; we correspond Equal-weight and Not-Rated to hold and Underweight to sell recommendations, respectively.

Stock Rating Category	Coverage Universe		Investment Banking Clients (IBC)			Other Material Investment Services Clients (MISC)	
	Count	% of Total	Count	% of Total IBC	% of Rating Category	Count	% of Total Other MISC
Overweight/Buy	1528	41%	444	49%	29%	690	42%
Equal-weight/Hold	1590	43%	374	41%	24%	725	44%
Not-Rated/Hold	4	0%	1	0%	25%	1	0%
Underweight/Sell	588	16%	87	10%	15%	220	13%
Total	3,710		906			1636	

Data include common stock and ADRs currently assigned ratings. Investment Banking Clients are companies from whom Morgan Stanley received investment banking compensation in the last 12 months. Due to rounding off of decimals, the percentages provided in the "% of total" column may not add up to exactly 100 percent.

Analyst Stock Ratings

Overweight (O). The stock's total return is expected to exceed the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Equal-weight (E). The stock's total return is expected to be in line with the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Not-Rated (NR). Currently the analyst does not have adequate conviction about the stock's total return relative to the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Underweight (U). The stock's total return is expected to be below the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Unless otherwise specified, the time frame for price targets included in Morgan Stanley Research is 12 to 18 months.
